

DOW™ LDPE 450E

Low Density Polyethylene Resin

Overview

DOW LDPE 450 E Low Density Polyethylene Resin has been designed with an optimum balance of melt strength and drawability to give excellent performance in cast film, foam, blown film and bubble film extrusion. When properly fabricated, DOW LDPE 450 E displays: excellent processability; low neck-down (cast film); very good toughness and impact properties; and good tear strength. In foam extrusion, DOW LDPE 450 E gives an ideal balance between cell growth and stabilization to allow the production of very low density products without voids.
